This application is in condition for allowance except for the following formal matters:

1. Applicant must submit the essential subject matter required by section III paragraph 3 and 3.1 of the office action dated 10/20/05.
  - a. " The incorporation of essential material in the specification by reference to an unpublished U.S. application, foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f). Unpublished U.S. Provisional Application 60/407,340 contains essential material that may not be incorporated by reference. Figures 6B, 6C, 7C, and 7D and the accompanying description of the operation of the clamping mechanism on pages 19-21 of provisional application 60/407,340 are necessary for a proper understanding of the invention."
  - b. This subject matter is deemed essential to the understanding of the clamp mechanism and may not be incorporated by reference, regardless of the availability of the referenced provisional application via the PAIR system. If applicant does not wish to enter the required subject matter, this objection may be overcome by canceling claims 14-15 and 45-46 directed to the clamp.
2. The following typographical errors must be corrected:
  - a. In claims 1 line 22, "a substrate carrier" should read - the substrate carrier- .

Art Unit: 3652

- c. In claim 51, line 15, "a substrate carrier" should read - -the substrate carrier- -.
- d. In claim 57, line 12-13, "a substrate carrier" should read - -the substrate carrier- -.

Prosecution on the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.
